WORK EXPERIENCE

Internship

- Learn and Build By Technest
I have completed a 45-day internship in Flutter app development and learned about the Flutter, Dart, Firebase, and API integration.
About Project: Weather app, users can first sign up or log in. Afterward, they can enter their city and state names to utilize an API for searching and retrieving area-specific weather forecasts.
- Internshala Training Partner
I served as an Internshala Training Partner, contributing to their training programs. My role involved actively participating in and supporting the training initiatives. I collaborated with Internshala to facilitate learning opportunities, enhancing the educational experience for participants.
- AICTE IDEA LAB, PIET
I have completed my first year in IoT, where I gained knowledge in ESP32, relay, Arduino, and Eagle CAD, which are integral components for designing printed circuit boards (PCBs).and successfully developed a Smart Switch project, which automates various types of switches for enhanced functionality.

PROJECTS

- SKY-VIEW (Weather forecasting APP) APP Development
<https://bit.ly/46kExb9>
(The weather forecasting app where user can create there account and using any city and state name they can find weather)
- Portfolio Website WEB Development
<https://satishparmar1.github.io/Portfolio/>
(A portfolio where all can see my work, achievements, and contact details)
- Proflamingo Website WEB Development
<https://satishparmar1.github.io/Proflamingo/>
(A Educational website where college take there test with security and student can do preparation on many technologies)
- Text Utility Website WEB Development
<https://satishparmar1.github.io/30DaysofCode/>
(A Text Utility Website where user add text and they can find characters, words and change into another case)
- Shree Sai Chemist APP APP Development
<https://bit.ly/shreesaichemist>
(A delivery app for medical where user can create there account and order medicine to the medical)
